Hotel room in Reykjavik: from € 100.- per night

Flies: from € 1.5.- per fly

**About**

June is the time when the first real hatches of the season start to become a daily thing. This can be a magical time for brown trout and char alike. We will be targeting brown trout and the last remaining sea trout on the Huseyjarkvisl River and brown trout and Arctic char on the Litla River.

Both rivers offer great opportunities for different methods of fly fishing – dry fly fishing, streamer fishing and nymph fishing.

Both lodges are comfortable and both have hot tubs on the back porches. Food prepared is made from fresh local ingredients with an emphasis on fresh fish.
